

CRM Database Source-Audited Specification

Generated from the Sales & Marketing blueprint plus MEDIA_SNAPSHOTS/UNICIRCUIT_MEDIA_DATA_FIELDS.md.

Database strategy: PostgreSQL is the single operational source of truth. File storage is only for large artifacts. Redis and warehouse are later optional stores.

Architecture

N8N + Agents -> CRM Integration Layer API -> PostgreSQL
API -> File/Object Storage for recordings/PDFs
API -> Redis later for queues/cache
API -> Analytics warehouse later only if needed
API -> Slack + Webhook Events
